Company Overview:

Poker Giant in US

The client is an organizer of poker tournaments in US. Poker, as one of the hottest game played in there, has many interested players, who want quality environment to play. The Client is bringing these games to favorite Taverns around the world! These are NOT online poker games, these are Live Poker Tournaments!

Challenges:

Client was very enthusiastic about the business idea of arranging league games at Taverns and registering players to take part in the league. Client was interested in reaping the Internet power for organizing events in the different cities.

Solution:

Mastiff Tech team did a concentrated effort to first understand the rules to play the league and tournament procedures. Initially, the site was created with some features of registration, event creation and scores updating. Client wanted to check the business idea feasibility. With time world tavern poker picked up and became the favorite site for the players. The site was started with .NET 1.1 technology and open source My SQL db. The whole system is framework based with modular structure and can be easily incorporated in other gaming leagues with little customization.

Result:

Mastiff Team competency can be gauged by the fact that the site gets the highest number of hits as a poker portal, ranking number one on Google, today. Currently the site is managing around 15,000 registered users and around 350 registered taverns across two countries. Players are pleasantly amazed with the facility of handle their account so smoothly through web, while Taverns are at ease by maneuvering the whole events and championship through web interface in quick seconds.

This is one of the most successful projects of its kind. The poker site is the most with Mastiff Tech for continuous up gradation and feature enhancement of new ideas in gaming.
