At **TechMileage** we combine technical expertise with the experience to produce the best possible IT solutions. Our Solutions are cost effective and bring life to business. We are committed to providing better, innovative, high performance solutions to our clients.

**Our Relationship with clients is a partnership – we bring our experience, best practices and tools, and apply them to our clients' unique requirements.**

**We develop Business Strategies and Technologies tailored to your unique requirements.**

Three fundamental objectives guide the operation of our business:

- To use our expertise to the benefit of our clients and partners through an open, collaborative approach;
- To ensure sustainable and profitable long-term growth; and
- To promote customer development

In addition to these goals, a formalized set of shared values guide our business decisions and shape our culture.

On the field, we bring our passion, integrity and innovation to each of our clients' projects. Whether it is applying the best techniques or bringing the latest thinking on process or architecture, all our projects are unmistakably TechMileage engagement

***TechMileage** helps clients deal with changing business and technology issues. Clients choose TechMileage because of the outstanding value and results that we deliver.*

## ***Our Services***

### ***Application Development Services***

TechMileage application development services revolve around latest tools and technologies. We focus on IBM, Microsoft as well as open source technologies. Some areas of expertise are service-oriented architecture, including J2EE, .NET, and PHP as well as Client Server, Business Intelligence and Data Warehouse services to create solutions that address your business needs and technical requirements.

*Latest additions to our expertise are the fast expanding mobile platforms, which includes iPhone, Black Berry and Android.*

TechMileage can build or modify your mission-critical applications to ensure reliable delivery of the service you need to compete in today's marketplace.

### ***Professional Services***

TechMileage's professional services deliver high-quality staffing services built on industry best practices. We work with our customers to recruit and retain the best IT talent possible. Our staffing model is comprised of two core services: IT Contract Staffing and Direct Hire Placement.

### ***Project Management Services***

We offer comprehensive, customized support to owners and managers of projects of all types and sizes. TechMileage associates offer great breadth and depth of project experience, and their expertise is further augmented by their commitment to a team approach. While each work contract has a specific staff assignment, our project managers consult closely within TechMileage's own Project Management office to ensure that special, relevant experiences and skills are applied to each client's situation.

### ***Quality Assurance & Testing Services***

Your applications play a critical role in delivering products and services quickly in today's always-on, IT-pervasive world. Our quality assurance and testing services deliver a comprehensive solution that minimizes application failures and helps you achieve business results you can measure. We improve the quality of your business applications by reducing defects. In addition, rework costs are reduced throughout your systems development life cycle, not just at the testing phase.

### ***Infrastructure Services***

Today's marketplace demands that your information technology (IT) infrastructure be efficient, flexible, dependable, and compliant while optimizing your IT return on investment. TechMileage can help you achieve this by making your IT environment safe, secure, efficient and adaptable. We deliver a comprehensive set of infrastructure services and support.
